Senior Frontend Engineer

React | Next.js | Web Development

A Seasoned Frontend Engineer with over 10 years of experience in development SaaS and enterprise-level products across various industries. Demonstrated expertise in JavaScript technologies, including React, React Native, Next.js, Node.js, and AWS, Azure, GCP. Adept at leveraging modern development practices and tools to optimize workflows and enhance user experiences.

WORK EXPERIENCE

Lennar – Remote

June 2023 - PRESENT

Senior Frontend Engineer

- Developed responsive **React.js** web applications for the company's **SaaS** platforms using **React Hooks** for cleaner state management.
- Used **TypeScript** for static typing, improving code quality and maintainability.
- Ensured cross-browser compatibility using **Styled Components**, **Emotion**, and **Chakra UI** for responsive design.
- Employed **D3.js** for data visualization, creating interactive and dynamic charts.
- Implemented **state management** solutions like **Jotai** and **Restful API** to manage complex data flows across components.
- Ensured cross-browser compatibility and responsiveness using **CSS-in-JS** libraries like **Styled Components** and **Emotion**.
- Implemented **React Native** for building cross-platform mobile applications, ensuring compatibility with both mobile applications, both **iOS** and **Android**.
- Worked with **WebSockets** for real-time communication, enhancing live updates and data syncing and utilized **MUI** for building modern, responsive UIs and ensuring consistency in component design.
- Integrated **Next.js** to enhance **SEO** and improve application performance through static site generation (**SSG**) and **SSR**.
- Worked extensively with **Node.js** to build scalable **API gateways** and integrate them with frontend systems.
- Utilized **PostgreSQL** for managing relational databases, ensuring efficient handling of large datasets and maintaining data integrity.
- Used **AWS Lambda**, **EC2**, **S3** for creating serverless functions, reducing server costs and improving app efficiency.
- Employed modern development practices such as **CI/CD** pipelines, automated testing with testing with **Jest Mocha**, **Cypress** and **Selenium**, and version control using **Git**.

Contributed to improving the system's **load times** by 30%, reduced **downtime** by ensuring seamless deployments, and enhanced overall **user satisfaction** through a well-optimized and responsive frontend architecture.

eBay – *Remote*

Jan 2022 – Aug 2023

Senior Frontend Engineer

- Led the development of a **Personalized Product Recommendation Engine** to enhance user engagement and optimize customer experience.
- Collaborated with **cross-functional teams** including **data scientists**, **backend engineers**, and **product managers** to build a scalable system.
- Used **React.js** and **Next.js** to create a responsive and intuitive user interface that seamlessly integrated with the recommendation engine.
- Used **GraphQL** for efficient data querying, ensuring that users received relevant product suggestions instantly.
- Developed microservices using **Node.js** and **TypeScript**, enabling independent scaling and easier maintenance.
- Implemented real-time data processing with **Apache Kafka**, allowing the system to dynamically update recommendations based on users' activity, reducing latency and improved system responsiveness, providing recommendations in under 200ms.
- Deployed the system on **AWS**, using services like **AWS Lambda** for serverless computing and **DynamoDB** for scalable data storage.
- Ensured smooth orchestration of the microservices, allowing us to handle millions of users without performance issues using **Docker** and **Kubernetes**.

PwC – *New York, NY*

May 2017 – Dec 2021

Full Stack Developer

- Developed responsive **React.js** applications for healthcare services, focusing on enhancing **user experience** and **mobile accessibility**.
- Collaborated with backend teams to integrate **RESTful APIs** and implemented **OAuth2** to ensure secure and HIPAA-compliant user authentication.
- Built dynamic, **data-driven UIs** using **React.js** for financial dashboards, allowing users to monitor their transactions in real-time.
- Optimized performance with **code-splitting** and integrated **Plaid's API** for secure access to financial data.

Procore – *Sydney, Australia*

Jul 2014 – May 2017

Full Stack Developer

- Developed **React.js** and **React Native** applications to enhance project management tools for the construction industry, focusing on building responsive, user-friendly interfaces across web and mobile platforms.
- Collaborated with cross-functional teams to integrate **RESTful APIs**, ensuring seamless data synchronization between mobile apps and web services.

EDUCATION

National University of Singapore - *Singapore*

Bachelor of Science in Mathematics and Computer Science, Jan 2010 - Jul 2014

PROFESSIONAL SKILLS

- **Frontend:** HTML5/CSS3, Bootstrap, JavaScript, TypeScript, React.js, React Native, React Hook, Tailwind CSS, Material-UI, media queries, CSS Flexbox, Redux, Zustand, Next.js, Rest API, GraphQL, Chakra UI
- **Backend:** Node.js, Express.js, C#/.NET, Python/Django, SQL databases, NoSQL databases, Rest API, GraphQL
- **DevOps and Testing:** AWS Lambda, EC2, S3, RDS, Azure Functions, Docker, Kubernetes, CI/CD, Jest, Cypress, Mocha/Chai, Postman, TDD, Selenium
- **Team Collaboration:** Agile Methodology, Jira/Trello, Git/GitHub, Slack/Zoom, Code Reviews
